CHINOOK PHARMACY

VICTROLAS
and
RECORDS

If you haven't a Victrola in your home it is because you don't know how perfectly it will play the music you like best.

It will bring to you all the popular songs of the day, all the old ballads of long ago and all the beautiful hymns

and sacred music

With it everyone in your home may enjoy the piano, flute, violin, cornet, chimes, xylophone, and any other instrument to their heart's content.

We can supply you with a Machine as low as \$21.00 and as high as \$400.00, with a few prices in between.

Our Record stock is complete. Call in and hear them Yours for business.

Breezelets

When you begin to detest the winter just remember how you fought with those mosquitoes last summer, and be contented.

What has become of the old-fashioned woman who could cook a square meal? asks an exchange

Yes, and what has become of the old-fashioned man who could provide one?

It looks as though King Constantine will soon be without a country to rule, but that ought not to bother him, seeing how little success he had in ruling it.

Germany will no doubt be interested in the information that Great Britain is making shells for the American navy. Perhaps the fact will also interest the American manufacturers.

Turkey must go, says an exchange.

It certainly must go some to win, if that what is meant.

It is not so much dressing up as dressing down that some of the short-skirted girls need.

Germany says she will respect Switzerland's neutrality.

Or is it another way of saying that she respects Switzerland's highly efficient army.

Money talks, but in these days when a dollar goes into catibles it just whispers.

The attendance still keeps up at the theatres of war.

The loafer, the kicker and the bluffer are three of a kind, and the breed is not conducive to the welfare of any community.

We understand that the council threatens a round-up of dogs, and intends putting them in a new class—K9.

Another woman, reading a parliamentary headline, exclaimed, "Pension Bill! Well, I never did! And we haven't even caught him yet!"

We are told that there will be a demand for lady grooms. It is incredible. And will there be lady best men, too?

Chinook Consolidated
S.D. No. 16

A meeting of trustees of the above school district was held on Monday evening, Jan. 22nd.

Members present: Messrs. Lensegraf, Marcy and Roberts.

Minutes of previous meeting confirmed.

Correspondence read.

Lensegraf, that the Chairman and Secretary examine the equipment of Bison S.D., now in use in the new school, and report at next meeting on the value of the same.

Marcy, that Secretary be instructed to bring to the attention of the Minister of Education the necessity of including in the legislation governing consolidated schools in this province, regulations similar to section 95 of the Public School Act of the Province of Manitoba. Also to find out from the Minister of Education of this province, if it would not be possible to hold the annual election of trustees for consolidated school districts in the latter part of the year, so that the engaging of teachers and van drivers for the year could be done, not by the old board of trustees, but by the new Board, during whose term of office they are to serve.

Following accounts ordered paid:

O. D. Dunford, supplies	\$ 3.75
Calgary Herald, advt	72
Adolph Deman, driv van	\$2.12
W. A. Pinkerton, salary	100.00
Agnes M. Connor "	70.00
Mary E. Rogers "	70.00
Union Bank, Chinook deb	156.00
for Bison S.D.	
Union Bank, ditto Popular	285.40

Marcy, that Secretary be instructed to offer Canadian Northern Railway Co., or C.N.R. Town Property Co., \$100 per acre for block directly north of the school, rather than \$150 an acre asked by them.

Roberts, that Secretary secure prices on hand fire extinguishers for use in the school.

Lensegraf, that Mr. Marcy, chairman of the board, arrange for the putting on of the school of the storm windows ordered for same, also for fastening to the floor of the seats in the junior room of the school.

Marcy, that the Secretary write Mr. Yake of Cappon, offering him the principalship of the school, salary \$1400 per year, duties to commence on Feb. 12th. Lensegraf, that Mr. Lorne Proudfoot be engaged as Sec. Treas. of the consolidated district salary \$250, the same as for 1916. Meeting adjourned.

Troubles

SELDOM COME SINGLELY

THE C.N.R. UP AGAINST HARD
LUCK

The biggest snow blockade on the C.N.R. between Calgary and Saskatoon has taken place this week, which has tied up the whole system between these points. The continuous blizzard during the past week, accompanied by a strong driving wind, has packed the snow into hard stone-like walls all along the track, making progress impossible, and stalling both the passenger and freight traffic to a stand-still, which lasted 6 days.

Several minor accidents have occurred in the meantime. On Saturday, the plowing outfit went off the track about 1½ miles east of Chinook, delaying traffic some hours, the west-bound passenger train being tied-up here. The track being cleared the passenger proceeded on its way to Calgary, but got bottled up in a snow bank at Delia, about 65 miles from Chinook. Two engines were sent out from Munson to bring the passenger in, but they died in the attempt. Engines were then sent out from Hanna and they succeeded in bringing the three dead units. How is that for Anna?

In the meantime, a freight train went through here going west on Saturday a few hours after the passenger, and when about six miles out fourteen cars went off the track, caused by spread rails—where they now remain. Two engines were then sent out from Youngstown to Hanna to get a supply of water and coal—one went dead in a snow bank at Richdale and the other went and got died in a snow bank at Stanmore, where it could stand no more; and then the old cow calved and broke her blooming neck, tying up the whole works from Saskatoon to Calgary.

On Saturday, while the snow plow was on its way from the east it was put out of business a few miles from here and was not released until Wednesday morning. There are two passenger trains and twelve or thirteen freight trains tied up between Alask and Drumheller.

Fortunately, no lives have been lost, or anyone injured. Sure the C.N.R. have struck hard luck, something over which they have no control, and the loss will be very heavy, that's certain.

R. M. OF COLLHOLME

FIRST MEETING OF NEW COUNCIL

The 1st meeting of the R. M. of Collholme, for 1917, met at Collholme schoolhouse, Saturday Jan. 27th, at 10 o'clock.

Members present: Messrs Marr Hittle and Falconer.

Mr. Marr was elected reeve for the year, and Mr. Hittle deputy reeve for the first half of the year.

Marr, that Lorne Proudfoot be engaged as Sec.-Treasurer of the Municipality, salary \$800.00, the same as for last year.

The minutes of the last meeting of the year 1916 were read and adopted.

Correspondence read.

Marr, that the Secretary be instructed to request the Minister of Municipal Affairs to appoint Mr. Kay Gardiner as councillor for division No. 4.

Marr, that Messrs. Hittle, Falconer and Harrington be the finance committee for the year; and that Messrs. Key and Gardiner be the by-law committee.

The following accounts were ordered paid:

Clover Leaf school dist.	\$900 00
Collholme "	300.00
Laughlin "	200.00
Mapleline "	150.00
J. M. Davis, ret officer	25.00
Jno Sibbald, d.r.o.	8.00

Lorne Proudfoot, balance of salary for 1916

sociation of Rural Municipalities

and Local Improvement Districts

to be held in Calgary on Feb. 7,

8th and 9th.

Hittle, that 1914 municipal tax

now amounting to \$6.60 be struck

off the s.w. qr 20-26-7-4, formerly

assessed to Gilbert Peterson, can-

celled by the government, and

re filed on by Wm. E. Ellsworth

on Oct 19th, 1914.

Falconer, that Councillors' fees

be the same as in 1916.

Council adjourned to meet in

the Collholme school-house on

Saturday, Feb. 24th, at 10 a.m.

Lorne Proudfoot, Sec.-Treas

WOMEN'S NERVES

Women, more than men, have excitable nerves, because of their work and physical strain tax their more delicate nervous systems and bring premature age and chronic weakness—unless treated intelligently.

Drug-laden pills and alcoholic concoctions cannot build up a woman's strength, but the concentrated medicinal food properties in

SCOTT'S EMULSION

build strength from its very source and are helping thousands of women to gain control of their nerve power—overcome tiredness, nervousness, impatience and irritability.

SCOTT'S is a liquid-food—free from drugs.

Scott & Bowne, Toronto, Ont.

Profiting by the War

Uncle Sam's Wealth Is Now Fixed at 320 Billions

"Since the beginning of the war in Europe we of the United States have sold to the warring nations and other foreign countries our products to the amount of over nine billion dollars, at liberal profits.

"We have loaned them two billion dollars at full interest.

"We have bought back from them our own securities to the amount of three billion.

"We have given the warring countries, to relieve their endless forms of distress and to answer their claims on our pity and charity through the Red Cross and all other agencies, about forty million dollars.

"We have gathered billions, flowing in lavish streams. We have doled out a few millions."

"These figures were given by the controller of the currency, John Shetland Williams, in an address at Norfolk, Virginia, before the Southern Commercial Congress."

"He said the latest available figures put the total wealth of this country at 320 billions—three times the wealth calculated for the German Empire in 1911, and more than twice the wealth of the entire British Empire as reported a few years since."

"He calculated that the total of all American gifts to the distressed of Europe, Asia and Africa has been less than one-twentieth of one per cent. of the income of the American people since the war began."

"He: Then perhaps you are afraid that I cannot support a wife?"

"She: Not in the least, but I think that a wife might find you insupportable."

"A fishing vessel of Dutch invention uses an electric light to entice fish into a net beneath the hull, whence a pump draws them by suction into a container within the craft."

Waste Wood Products

Lumbering Is the Third Greatest Industry in Canada

In an address on the chemical and industrial possibilities of Western Canada, delivered at Vancouver before the meeting of the Canadian (Pacific) branch of the British Society of Chemical Industry, Dr. R. H. Clark, M.A., Ph.D., of the University of British Columbia, made the following reference to the forest wealth of this province:

"Lumbering is our third greatest industry. The United States forest service has estimated that in, from twenty to thirty years, their forests will be depleted. In Canada and the United States we use 500 feet per capita per annum, and about sixty feet per capita in Europe."

"A single issue of a New York newspaper's Sunday edition requires fifteen acres of forest. The waste of our timber resources is due to fire, careless logging, wasteful mill operations and over-production. In all, it is claimed 75 per cent. of our forest products are wasted, 20 per cent. of the log (the upper part) is left in the woods to rot, and one-third of the slab residue is consumed in refuse burners."

"The importance of the forests arises not solely from their being the source of our timber, but, still more important, because of their bearing upon our water supply. In forest cover not only is erosion impossible, but the rains evaporate more slowly, the snows melt less rapidly, the runoff is gradual, floods cease, and streams are available for waterpower."

"As Mr. Finches says, 'when the forest falls, every man, woman and child will feel the pinch.'"

"The problem has been solved in Europe. The forest of Germany are 300 per cent. better than seventy years ago, and the yield per acre is sevenfold what it was. Let us suppose we do with our waste wood products here in British Columbia? Our wood distillation plants in the past have been successful as has been hoped for, the yield of turpentine being too low to compete with southern forests, and the yield of wood alcohol and acetate of lime too low to compete with the hard woods. Yet it has been known for a long time that the cellulose, or woody material, can, by the simple action of mineral acids, be converted into dextrose, which, in turn, is attacked by ordinary yeast and converted into the best of alcohol, such as we get from grain and potatoes."

"The passengers on a steamer were having a rough passage, and among them was a judge and a barrister. The latter was very ill, and the judge, perceiving his friend's plight, asked solicitously, 'Can I do anything for you?'"

"'Yes,' replied the barrister. 'You might overrule this motion!'"

British Workmen Like Daylight Law

Putting Working Hours Ahead of Solar Time Proves Beneficial

Inquiries in the leading centres of industry indicate that the operation of the summer time act is among the most popular of the effects of increasing the output in shipyards and engineering works. On the northeast coast of England the yards have been able to arrange additional spells of daylight overtime, and in other establishments there has been an increase in output owing to the fact that there are in the aggregate a large number of extra hours when work can be carried on without the aid of artificial light and with a lessened sense of fatigue.

"If statistics can be kept which will enable comparisons to be instituted between the output of the past summer and the corresponding period of last year it is believed that the comparison will be all to the advantage of the present year."

"Additional evidence of the benefit of the act is given by the railways, it has been stated in the official organ of the National Union of Railwaymen that the alteration of the clock has been followed by an improvement in the working of long-distance mail goods trains. It has been found that the extra hour of daylight has enabled the trains to be made up in the morning, to test, and there is a general feeling in railway circles that the summer time act should come into permanent operation, as it would enable the work of railway goods yards to be conducted with greater rapidity and safety. The point which seems to appeal to the men who are on eight-hour shifts is that, whatever the turn of duty to which they are assigned, they either begin or finish work in daylight. This may seem to be a small and unimportant matter, but the fact that it has caused comment among a large body of workers reveals an unexpected source of dissatisfaction with the long hours in advance of solar time has been discovered."

Asthma Victims.—The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of asthma, to see the life fairly threaten the existence of life itself? From such a condition Dr. J. C. Williams' Pink Pills for Pale People have brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

The Cowardice of An Inclusive Peace

Extract From the Pastoral Letter of Cardinal Mercier

The war is less. What does it matter? It is less to have a cooling of the fever, since it arises from human passions, and one should not wish to avoid it. The price of higher peace, the sake, at any price, would be to accept with equal indifference justice, injuries, truth and lies. It would be cowardice and impiety!

We must thank God for the mercies which he vouchsafes to us in our unhappiness. Let us bless him for having given us enough patience to endure our long and painful trial. According to the report of those who follow their work closely, our exiles rival in patience and self-sacrifice the combatants who have not left Belgium. We will welcome them with open arms when they come back, and, if they doubt it, they will find here friends and brothers who will have remained steadfast in their faith."

Our sufferings have made us less selfish. There was a time when we were not very deeply moved by the massacres of Armenians. Mohammedan fanaticism has put to death thousands and thousands of these unfortunate people during the present war; their wives and daughters have been taken as slaves. Pity them, pray for them. Poland, too, Poland, always true to her faith and her promises, who has never wavered in a hour of conquest, but only sought for the freedom of the people and for civilization, suffers more today than we do. Her sons are scattered among the Russian, Austrian and German battalions, her soil has been ravaged by the ebbs and flows of the armies. In the Russian army, during the war, pray for her, my brothers, and ask God that one at least of the happy results of this horrible war may be the final acknowledgment of Polish independence."

And unto the last let us remain patient and persevering. Let us remain calm, steadfast, without murmuring. Let us apply to our patriotic education the words which our avowed uses, speaking of our eternal salvation. "He who endureth unto the end shall be saved."

Feeding in Open vs. Barn Feeding

"Live stock holdings in central Alberta have increased by twenty-five per cent. in the last few years," says Mr. G. H. Hutton, Superintendent of the Dominion Experimental Farm at Lacrosse. "At our farm, Hutton continued, 'We have experimented in wintering cattle in the open, with no other protection than that afforded by bluffs and hayracks. We have fed five cars of cattle in this way and turned them off in finished condition. The thermometer has gone to fifty degrees below zero, and yet in some years we have gained 300 pounds per head in winter feeding. On two and three-year-olds we have gained 420 pounds from May to February. We have costed farm and open feeding for three years, and in all cases greater gains were made in the open.'"

Easy Marks

"This world would be a pleasant place if there were not so many fools in it."

"Yes; but it would be more difficult to make a living." — Boston Transcript.

HEAD OFFICE: TORONTO

A Fitting Memorial

Window of Ypres Glass for Canadians Unveiled at Chateau, Sussex

A window containing fragments of glass from a Ypres cathedral has been unveiled as a heritage in Craft (chapel) at Chateau, Sussex, in honor of the Canadians who fell on the Ypres salient in France. On the stained glass is an inscription within a wreath, reading:

"This glass is the gift of a private in the 20th (Vancouver) Battalion of the Canadian Expeditionary Force. It is from the Church of St. Martin in Ypres, and is placed here in memory of the officers, N.C.O.'s and men of the battalion who fell in defense of the Ypres salient during April, May, June, July, 1916."

The glass was donated by Rev. W. H. Kippes, M.A., of the University of Toronto, and is the gift of the Ypres salient in memory of the officers, N.C.O.'s and men of the battalion who fell in defense of the Ypres salient during April, May, June, July, 1916."

Minard's Liniment Cures Distemper.—First Tommy (to second Tommy, who was laughing at German officers): Shut up, Alf! Can't yer see the blighters don't understand English! And it's a blinding shame to waste all that good bad language out on 'em!

A CAUSE OF INDIGESTION

People Who Complain of This Trouble Usually Are Thin Blooded

This blooded people usually have stomach trouble. They seldom recognize the fact that thin blood is the cause of the trouble, but it is. In fact, thin blood is the most common cause of stomach trouble; it affects the digestion very quickly. The glands that furnish the digestive fluids are diminished in their activity; the stomach muscles are weakened, and there is a loss of nerve force. In this state of health nothing will more quickly restore the appetite, the digestion and normal nutrition than a good dose of Dr. Williams' Pink Pills. Pink Pills act directly on the blood, making it rich and red, and this enriched blood strengthens the digestive nerves, stimulates the muscles and weakens the normal activity of the glands that supply the digestive fluids. The first sign of improving health is an improved appetite, and soon the effect of these blood-making pills is evident throughout the system. You find that what you eat does not distress you, and that you are able to eat more without feeling irritable and listless. This is proved by the case of Mrs. J. Harris, of Grand St., Toronto, who says: "About three years ago I was seized with severe attack of indigestion and vomiting. My food seemed to turn sour in my stomach. I ate and I would turn so deathly sick that sometimes I would fall on the floor after vomiting. I tried many different remedies, but they did not help me. Then I went to a doctor, who gave me some powders but they seemed actually to make me worse. Instead of better. This went on for nearly two months and by that time my stomach was in such a state that I could not keep down a drop of water, and I was wasted to a skeleton and felt that life was ebbing away. I was married at this time and one Sunday evening on the way to church with my husband, I was taken with a bad spell on the street. He took me to a drug store where the clerk fixed up something to 'take, and my husband and I went home. Dr. Williams' Pink Pills. By the end of the first week I could feel some improvement. I was able to eat again, and I gladly continued taking them until every symptom of the trouble was gone. I was again enjoying the best of health. These Pills are now my standby and I tell all my friends what they did for me."

You can get Dr. Williams' Pink Pills from any dealer in medicine or by mail at 50 cents a box or six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

Trench Descriptions Vivid

The soldier is not usually a man of words, but he can string them together very effectively at times, and make his similes would not disgrace the American cowboy. The past masters though they are in the art of picturesque and vivid phrase-making, the soldier is not much to be envied. "I would, I would, I would stir your tea while you were stirring it," is the description I heard applied to one of our own soldiers. Ideas of ownership; and of another of parsimonious habits it was said "He thinks his money about like a man with no arms." — London Chronicle.

"Eddie, what's the matter?"

"No, I tried to hang some pictures on a wall."

"Words failed you, I suppose."

Cleveland Press.

"Four o'clock stop."

"This sort of life has got to stop. One never gets enough sleep; one can't work; one makes oneself ill; one has to go to a sanitarium. One is old before one is young."

"Oh, Arthur, why don't you say you haven't any more money, and let it go at that."

Laundries and Crime

Among the many minor aids to the detection of crime possessed by Scotland Yard authorities none is more efficient than the "Register of Laundries," a huge brass-bound volume containing lists of all establishments in the kingdom where washing is taken, together with the distinctive signs and letters employed by each in marking their customers' linen and underclothing.

Practically every laundry has its own private mark, usually a combination of two or more letters of the alphabet. Following these, on each article sent by a customer to the laundry, is the number corresponding to the said customer's name in the books of the concern.

It is not difficult to see how this practice may be turned to the advantage of the police, and, as a matter of fact, it has been the means of bringing to justice at one time and another quite a large number of criminals. — London Mail.

Warts are unsightly blemishes, and corns are painful growths. Holloway's Corn Cure will remove them.

Wireless Device for Moving Trains

Mail Relay, telegraph operator in the commercial offices of the Canadian Pacific railway in Calgary, a young man who has always had an inventive genius, is the discoverer of a good device for relaying commercial messages from one moving train to another. It has been tested by the railway authorities, and is now in the big corporation, and, according to report, most of them have passed upon it as a device of merit and value.

The tests have been carried on between handcars and rail motor cars. The device is a small, portable, self-contained instrument which will probably be entirely preventive of collisions and many other forms of wreck which have been due to the fact that operators and dispatchers heretofore have not been able to communicate with fast moving trains.

Minard's Liniment Cures Colds, Etc.

"You seem to enjoy working with a lawn-mower."

"Yes," replied Mr. Chuggins. "It's a good deal of relief to slow speed along with a machine that doesn't burn gasoline or have to be cranked up."

Birds Beat Records Of Human Flyers

Feathered Aeronauts Can Remain in the Air Much Longer Than Modern Aeroplane

Among the greatest ornithologists of recent times was the late Wells Woodbridge Cooke, who has contributed a vast amount of information regarding the migration of birds. He found among the many other startling facts that some birds cover a great distance during their migration. In a report on "Our Shore Birds and Their Future," Cooke says:

"Most migratory birds, in crossing large areas of water, start soon after sundown, and reach their destination before dawn. The Pacific gull, for example, flies the whole day as well as the whole night, and as it probably does not exceed a speed of 20 miles an hour, the single flight from Alaska to Hawaii consumes nearly twice as long. How, then, does the bird's mechanism to the best advantage yet made? These feathered aeronauts remain in the air several times as long as the modern aeroplane, and there is much the same difference in the efficiency of the two machines."

The to-and-fro motion of the bird's wings would seem to be an economical way of applying power, since all the force required to bring wings forward to begin another stroke is more than wasted, because it increases the air friction and retards the speed. On the other hand, the screw propeller of an aeroplane has no lost motion. Yet less than two feet of fuel in the form of body fat suffice to carry a bird several hundred miles at 2,000-mile speed. To be equally economical, a 1,000-pound aeroplane would have to burn a single pint of gasoline in flying 20 miles, instead of the gallon now used by the latest models."

Bing: He's very active in financial matters, isn't he?"

"Bang: You bet; he owes me ten dollars, and every time he sees me he dodges me."

Sore Irritated Eyes

GENERAL DRAYING

All orders promptly attended to
 Office: Opp. Crown Lumber yard

The White Ensign

The fact that we enjoy the liberty of the oceans is entirely due to the ungrudging self-sacrifice on the part of our seamen. They are the men who, in the face of great difficulties and terrible dangers, successfully fought for us, and won, by sheer grit, the mastery of the seas. Naturally this was followed by conquest after conquest on land, thus gradually bringing into being the British Empire as we know it to-day.

Now, the men who did all this were not superhuman, far from it. They were drawn from plain every day people, such as one is accustomed to converse with any day. Young men often imagine service in the Navy to be something especially trying and difficult. It is not so. Any young fellow with average brains can and would make good after a normal period of training. Once having tasted the romance of sea life, he would never give up his interest in its varied occupations.

Now, the point is this. Many of us consider that no matter what is happening on the sea, it must be quite all right because the British navy is on the job.

This is a charming compliment to our Fleet, but has it ever occurred to you that ships cannot be worked without men? The expansion of our Navy has been so enormous during this present war, that the Admiralty resources are taxed to the uttermost in the effort to obtain enough men. That dangerous feeling, that the Navy is sufficient unto itself, has been the cause of much anxiety in its relation to the task of securing recruits. Young men, make no mistake. By not joining the Navy, you are playing with Fate. Our armies may swell to many millions, but all the armies on earth would avail us nothing were our fleet to meet disaster. "Our Navy is strong," you say. Grapled, but starve it, give it insufficient supplies of men, what then? Let all who can take heed by this. Come forward and offer yourself for service in the Fleet. If you lack experience, don't let that stop you. There are many things you can do as efficiently as a trained seaman.

Recruits are now being asked by the Royal Naval Canadian Volunteer Reserve, for service on Canadian Coast Patrols. This Corps was the first unit called out for active service in the

Dominion of Canada.

All British subjects (except those of enemy blood) are eligible for enlistment.

The pay is \$1.05 per day for ordinary seamen, \$1.10 per day for able seamen. Separation allowance \$20.00 per month.

We must have hundreds of men at once in order to cope with grave problems now arising on both Canadian coasts.

Submarines are ugly weapons, and as much of their strength lies in their ability to keep out of sight, nothing but a very extensive patrol system will avail against them.

Call at the Naval Recruiting Offices at Calgary, Edmonton, Red Deer, Medicine Hat, or Lethbridge, Alta.

Quite a bit of interest has centered on the police court for some time past, the occasion being the arraignment of several farmers and a couple of elevator men for infringement of the Grain Act. A couple of the cases were heard by Magistrate Cairns on Thursday last, and judgment was reserved until next week.—Youngtown Plaindealer.

Under the auspices of the local I.O.O.F. the following noted companies have been engaged for the present season, in Arm's hall, Chinook:

Feb. 26th—Fax-Wilson Co. Jimmy Fax is well-known as "The king of fun-makers."

March 17th—The Toronto Ladies' Quartette. This will be a great treat to those who attend.

March 29th—The noted Dixie Jubilee Singers.

R. M. of Sounding Creek,
 No. 273

Applications for the position of Secretary-Treasurer of the Rural Municipality of Sounding Creek, No. 273 will be received up to Feb. 14th. Communications may be addressed to any of the Councillors, or to the undersigned.

R. N. MANGLES, Sec.-Treas.

Notice

A Convention of the Independent Electors of the Constituency of Acadia for the purpose of nominating a Candidate for the next Provincial Election, will be held in Arm's hall, Chinook, on Thursday afternoon, March 1st, at 2 o'clock. More particulars later.

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF \$500, OR ANY MULTIPLE THEREOF

Principal repayable 1st October, 1910.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognised bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA
 OCTOBER 7th, 1916.

Better Buying
 and Selling Service
 for the Farmer

This Company—farmer owned; farmer controlled—with its expert buying and marketing facilities is at your service. We will give you latest track quotations on your grain and live stock, handle same on consignment and secure for you highest possible market prices, or buy for you or your neighbors practically any commodity you wish for use on the farm such as Lumber, Posts, Machinery, Salt, Fruit, Wire, etc., at rock bottom prices.

We profit only when you profit; our interests are one and the same.

Write to-day for complete information.

Let us prove our Service to you.

The Alberta Farmers' Co-operative
 Elevator Company Limited

320-340 Lougheed Building - - Calgary

SYNOPSIS OF CANADIAN NORTH-
 WEST LAND REGULATIONS

THE sole bread of a family, or any male over 18 years old, may homestead a quarter-section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the District. Entry by proxy may be made at any Dominion Land Agency (but not Sub-Agency), on certain conditions.

Duties—Six months residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required, except where residence is performed in the vicinity.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$3.00 per acre.

Duties—Six months residence in each of six years after earning homestead patent; also 50 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions. A settler who has exhausted his homestead right may take a purchased homestead in certain districts. Price \$2.00 per acre. Duties—Must reside six months in each of three years, cultivate 50 acres and erect a house worth \$300.00.

The area of cultivation is subject to reduction in case of rough, rocky or stony land. Live stock may be substituted for cultivation under certain conditions.

Better Farming Is Being Taught

Alberta Institutions Are Working Along Practical Lines

Harkening back to the days of the little red school-house (if perchance it were, perchance) the fact that the system of education, associated more or less directly with the historic three "R's," and a slender, but pliable, birch rod. Good men were produced under the system, but it is yet to be established that the plan of education which followed, and extends partially into the present age, showed the essentials of perfection to any practical degree so far as it concerned the rank and file.

The system of education which aims at the development of the hand as well as the mind, and the training of young manhood and womanhood for everyday life, rather than for professional careers, is not only a new thing in practice it is not in thought, and there are still with us those who look askance upon workbenches and muddling dishes and who regard these unquestionably spell the partial extinction of a custom which placed the law, medicine and the sciences as the fins in every text book.

The introduction of business and vocational systems into the schools has been followed with marked success throughout the country, but in the teaching of agricultural subjects there has not been a corresponding advance. It is to be accomplished in the public and high schools. It is in this line, however, that the greatest advance has been instituted and maintained by the Alberta provincial government and situated at Vermilion, Alberta, the University of Alberta, are accomplishing a great deal toward the betterment of farming conditions and toward the education of young men and women for practical and more scientific work in the farm home and fields.

Not many years ago agricultural education was regarded as unnecessary and impracticable. While there are even today many who regard such systems of instruction as a waste of money and time, the average farmer has become progressive enough to seek for more information and better methods in handling stock and growing crops.

He recognizes that such information can be supplied to a considerable extent by special investigators and instructors. He is anxious also that his children should take advantage of the opportunity afforded by such demonstration farms and schools. The department of agriculture has been provided by the department of agriculture. Undoubtedly these farms have become more proficient in farm work than their parents, and thereby become of more value on their own farms as well as to the community. It is for this reason that farmers that these schools of agriculture are being operated.

In the agricultural schools practical subjects are taken up, such as judging, feeding and care of live stock, handling of soil, and the use of tools in carpentry, blacksmithing, poultry keeping, dairying, veterinary science, horticulture, weed, seed identification and eradication.

The domestic science department is practically in the home-making sense. It is intended to train the women for efficient housework. It includes some theory and a great deal of practice in sewing, cooking, home nursing, home administration, laundry, household sanitation, dairying, poultry, horticulture, feed husbandry, and a thorough elementary course in English, mathematics and science as applied to the home.

A diploma in agriculture is given to those completing a two-year course and to the graduates from the domestic science course a agricultural certificate is awarded. Men passing the agricultural examination with a fairly high standing in all subjects may continue the study by completing a three-year degree work at the College of Agriculture in connection with the University of Alberta.

Babylonian Extravagance

New York City, Fighting the High Cost of Living, Spends Money Like Water

New York is rolling, revelling, rollicking in wealth, says an United Press writer here.

New York's banks today hold reserves of \$816,794,200, and from every quarter of the globe money is pouring in—actual yellow gold by the million to be changed from the coin of other nations in the U.S.A.

Wall street has become a gambling table on to which is being poured money from the earnings, winnings and savings of Americans and money from the coffers of kings and emperors.

While the large majority of New York's six millions are fighting the universal struggle against the high cost of living, on the surface it appears that everybody has money to spend. They are spending it for necessities and luxuries.

Forty or more blocks in Manhattan are given over entirely to the entertainment of the rich and the money from spenders say they never were able to take so much of it before.

Ancient Babylon could be set down inside New York's winter pleasure grounds without being noticed. Scarcely a word is said in the reputation outside of his own block. Cabarets have sprung up like mushrooms and are as numerous as in any new gold camp.

"Business is three times as big as last season," says the manager of the largest cabaret in the city. "Hotels are crowded, and the crowds fill the department stores. Warehouses are depleted of stocks and deliveries are far behind."

Military Compulsion in United States Advocated

Danger as Based on Development of British Army, Organization of Canadian Forces, and Anglo-Japanese Alliance

Advocates and opponents of a system of universal training for military service to replace the present system as the mainstay of the nation's defence, had a hearing before the United States Senate Military Committee, on Senator Chamberlain's bill for universal training which is supported by the Army Department.

Major-General Scott, Chief of Staff of the army, detailed to the committee by the General Staff considers the volunteer system wholly broken down, inefficient and useless, and urged that it be discarded for a universal system of liability to training and service.

General Scott, disclosing much of the Army War College material hitherto regarded as confidential, showed that the Army General Staff now believes that instead of 500,000 available men, which it considered sufficient as a standing army, the country against invasion, the country should have 1,500,000 fully-trained men as a standing army.

With a like number ready to follow in ninety days. The change is based on the development of the British army, the organization of the Canadian forces and the British alliance with Japan.

The lessons of the European war, General Scott said, had demonstrated that a higher standard of training and discipline were required than in any previous war. The European nations, and that most of the European nations for that reason found they were unable to maintain less than two years with the colors.

"It should be obvious," said he, "that 192 hours' training prescribed for the National Guard is utterly inadequate to prepare this force for war service."

For war with a first-class power the General Staff had previously estimated that 500,000 fully-equipped troops should be ready at the outbreak of hostilities, and that this force be available in ninety days. In view of the lessons of the war, the General Staff now estimates that the numbers should be tripled and that 1,500,000 fully-equipped and ready troops should be available within another 150,000 days.

"This is due," said he, "to the fact that one of the powers involved in the war of 1914-18, Germany, extended the whole length of our northern frontier, has increased its army from 400,000 to 1,000,000 men, and approximating that of the other great European powers. Due to the fact that our northern frontier is so long, an island Empire, a great portion of any trained force it may possess can be spared for use in a distant theatre of operations."

Help Northern Indians Along in Agriculture

Plan to Aid Them as a Means of Making Them Permanent Workers

Believing that there will be an influx of settlers in the country along the Hudson and Great Waterways, the Indian Affairs Department has decided to encourage them to settle at once, and permanently, on the most fertile lands or thereabouts. The most effective way of doing this, the Indians would be to appoint a farm instructor to have direct supervision of the northern bands, and to grant them a certain measure of assistance in the form of agricultural implements and seed grain.

The Indian Affairs Department, and McMurtry a year or more ago are reported quite suitable for the needs of the natives, who are now free from the annoyance of white settlers squinting upon their locations, but who nevertheless are being urged to settle themselves without further loss of time.

It is a plan of training to learn, on the authority of official figures just given out, that the Indians of Alberta as a whole are increasing in number and prosperity, and according to the theory generally held a few years ago that the days of the reds were drawing to a close.

Now in this province alone an Indian population of 8,000, and so great has been the recent progress, that the people that their real and personal property figures down to \$1,655 for every man, woman and child.

The Indians have made the greatest increase in all Canada in average per capita income. In the last year they have worked their average earnings for each individual up to \$75.20, which is a gain of thirty per cent over the year previous.

Ameer of Afghanistan Baffles the Kaiser

Secret Mission Sent By Germany Meets With Utter Failure

The London Chronicle of November 30 contains the following: "The Kaiser, Chamberlain, replying in the House of Commons to Sir Edmond Cornwall, said: 'In the spring of 1915 the German Government decided to send a mission to Afghanistan. The mission was selected from among a number of Indian anarchists in Berlin a secret landowner from Quetta, who posed to them as a ruling chief, and as such was received in audience by the Emperor.'

"This person was accompanied by a party of German officers, some Turks, and another Indian anarchist, a Muslim. The principal German officer, Lieut. von Henig, was the bearer of a letter from the German Emperor to the Ameer, in which the latter was invited to advise the Emperor on the subject of the proposed Russian advance into the Indian Empire, and to liberate from British tyranny.

"Von Henig was also charged to make important revelations to the Ameer. The mission was to be a secret one, and the German Government would in the future expect the Ameer to be a German ally, and to liberate from British tyranny.

"The mission broke up in Persia, and succeeded in making its way in the summer. They were arrested on arrival and eventually conveyed to Kabul towards the end of the year. There it was discovered that the Ameer and his people quickly apprised these Germans and the Indian anarchists of their mission, and they were accompanied at their true value.

"It is true that the intervention of the Ameer in the matter of the mission was a complication and placed his Majesty the Ameer in an exceedingly awkward position. The mission was a secret one, and the German Government would in the future expect the Ameer to be a German ally, and to liberate from British tyranny.

Russian Troops See British in Pictures

Forces of Czar Are Brought Into Contact With Movies For First Time

An officer of the British army has recently concluded a tour of the Russian front with a cinematograph camera, and has shown the results of his mission to the British army in the making, and he has displayed pictures to scores of thousands of Russian troops, many of whom had never even seen a cinematograph show before.

It can hardly be said that a film has ever been shown under such strange conditions. More than once the show had to be stopped, all lights turned out and the audience of some thousands ordered to disperse on account of the approach of a Zeppelin.

The films were shown in stuffy tents and in the open air, sometimes in the rain, but with the interested Russian troops enthusiastically waiting and watching.

Not one in a hundred thousand Russian soldiers had ever seen a British Tommy. The film showed these soldiers of the British army, precisely what their British allies look like, and gave them a full realization of his training, equipment and weapons.

The new British film of the battle of the Somme is also to be displayed to the Russian troops. Then the Russian troops will know more about the actual fighting in France. Preparations are being made, too, for a film of the British army, which will be displayed to British troops in England and in France.

Australia Is One Of The Oldest Lands

Who First Discovered Continent Is a Question, However, That History Has Not Settled

Australia, which of late has figured so prominently in the news of the world, is one of the oldest lands in the world. As far as annals are concerned, it is one of the oldest lands among the youngest. Who first discovered the great southern continent is a question still unsettled, and it is likely as far as can be seen, to remain so; but one thing seems to be certain enough, and that is that for many centuries before its coasts were sighted and explored by Europeans the fact of its existence was generally known to both the east and west.

The Chinese, who have managed to forestall Europe in many things, had knowledge of the continent, as far back as the thirteenth century. The Malays were probably acquainted with the northern coast of Australia, as Polo, the great traveler of the thirteenth century, makes reference to the reputation of existence.

There was no great dramatic discovery of Australia, such as there was in the case of America. It seems, however, to have straggled into the knowledge of the west by way of ships blown off their courses, and through tales carried overland from the east.

Early in the seventeenth century, however, Philip III. of Spain took an expedition of discovery from Callao, Peru, under Admiral de Torres, to the southern coast of Australia. The little fleet, consisting of three vessels, sailed from Callao Dec. 17, 1595, and sailed on to the west, reached one of the islands of the New Hebrides, which was at once sailed, and then sailed on to the south, and then sailed north towards the Philippines, and may possibly have caught sight of the continent, but it is not known on his way. He did not, however, reach the continent.

The next few years were years of discovery. In the same year that de Torres sailed from Callao the little Dutch vessel, the Duytschland, sailed from Batavia, Java, on a voyage of discovery. The voyagers succeeded in reaching the continent, and explored a considerable stretch of the Gulf of Carpentaria. This was followed by several other expeditions. In 1622, a Dutchman, and by 1665 the Dutch possessed rough charts of almost the whole of the continent, while to the mainland itself they had given the name of New Holland.

The first English navigator to sight the Australian continent was William Dampier. This was in 1688, and on his return to England, the account of his voyage was published, and his being sent out in the Roebuck in 1697 to prosecute his discovery of the continent. He was accompanied by a Dutchman, and by 1665 the Dutch possessed rough charts of almost the whole of the continent, while to the mainland itself they had given the name of New Holland.

The first English navigator to sight the Australian continent was William Dampier. This was in 1688, and on his return to England, the account of his voyage was published, and his being sent out in the Roebuck in 1697 to prosecute his discovery of the continent. He was accompanied by a Dutchman, and by 1665 the Dutch possessed rough charts of almost the whole of the continent, while to the mainland itself they had given the name of New Holland.

Chinook Breezes

Is that ground hog going to see his shadow to-morrow or not?

A dance is billed in Arm's hall on Friday night. Music by the Maxwell orchestra.

It was fortunate that Chinook got in several cars of coal a day or two before the snow blockade.

A few Chinookers are amongst those installed on the train between here and Calgary.

Chinook has been without any mail for 6 days. Something like olden times before the advent of the railway through here.

It is rumored that some of Chinook's citizens will know all about Delia by this time—where the passenger train has been bottled up the past week.

We are pleased to learn that Mrs. Easom, who went to the Oyen hospital a week or so ago, and who went through an operation there, is progressing favorably, although somewhat weak, and is expected home shortly.

The monthly meeting of the Chinook Women's Institute will meet at the home of Mrs. A. Nicholson on Wednesday afternoon next, Feb. 7th. Red Cross work will occupy part of the time. All ladies are cordially invited to take a part in this good work.

Some Gold

Since last Saturday the weather has been extremely cold, the thermometer registering between 25 to 40 below zero the whole of the time.

For a Worthwhile Cause

A St. Valentine's box social and dance will be given on Wednesday, Feb. 14th, in Buzzard's hall, Cereal. The program will consist of: 1—Musical selections 2—Patriotic Speeches by members from parliament building, Edmonton; 3—Sale of boxes; 4—Dance, good music assured. As all the proceeds are to be devoted to the Patriotic Fund, this social deserves hearty support. "Keep the Home Fires Burning"

Was a Musical Treat

The Arthur Leslie Concert Co. gave an entertainment here on Saturday evening to a very good house, especially considering the blizzard that suddenly sprang up and continued all through the day and night. The concert was of a high order, the orchestra being musicians every one. Arthur Leslie in his wonderful marionette characters "brought down the house," and was certainly "the tiniest dancer ever," he is a soloist of no mean order. Altogether, the concert was much above the average and very much enjoyed.

Dog Lost or Strayed

Tan Pup, star on neck, four white feet, had collar on when lost. Last seen on Jan. 25th. Reward.
